SECTION 1 (cover page): Introduction (in English)

Name of the Case

Radiona / Makerspace

Abstract

Radiona / Makerspace – Association for Development of ‘do-it-yourself’ Culture has been founded in order to enhance the visibility of makers’ open source culture and self-sustainable production, as well as with an aim of connecting all possible fields of art, science and technology. The objective here is to create new realities of networked and collaborative intermedia and new media practices in line with world trends such as DIY (do-it-yourself) and DIWO (do-it-with-others). Radiona.org focuses its activities on education, research processes, artistic projects, curatorial practices, international and domestic inter-sector collaborations, renewable systems and social awareness related issues...
